The authors share all of the background information you'll need to get started, beginning with descriptions of the various types of canoeing being practiced today to help you determine the type of paddling that suits your needs. They discuss fitness basics, food and nutrition needs, and gear and equipment—from the canoe itself to life jackets, paddles, and clothing. They then cover important safety and survival guidelines, including weather, river hazards, capsizing, cold-water safety, and rescue protocols. Great instructional book, easy to understand. Any new canoeist should read this as it contains much information on paddle strokes techniques.

Very informative!

This text is excellent. It is full of photos that clearly show everything that is explained. Covers all paddle strokes, safety, pre-planning, types of canoeing, and river reading (with great diagrams.) Only thing missing is an index - so at times, it's hard to find exactly what you're looking for. But a great read and resource!
