Managing In The Public Sector: A Casebook In Ethics And Leadership

Synopsis

Casebooks in public administration have become intensely sophisticated with complex scenarios, richly detailed multi-step simulations, and demanding role playing requirements. While these types of cases and exercises have their place, *Managing in the Public Sector* is a casebook designed with maximum instructor flexibility and student engagement in mind. Featuring cases brief enough to be covered in the last few minutes of a class as well as those substantive enough to last the entire hour, this book allows instructors to illustrate theoretical concepts, encourage active student participation, to make a transition between topics, or to integrate different approaches to administrative study. Retaining the first edition's use of focused, real-life-inspired cases to help elucidate the application of concepts for students, the second edition has been updated and revised throughout to include:

- An expanded chapter on ethical analysis
- A new section on how to make logical arguments
- Thoroughly updated cases as well as many new contemporary cases
- New chapter introductions featuring overviews of major leadership and ethical theories to provide students with the context they need
- Discussion questions at the end of each case to facilitate critical analysis and classroom discussion
- A cross-listing of all cases and subject matter in an appendix for quick topical reference.

Now even more enmeshed in the literature of ethics, leadership, and public administration, *Managing in the Public Sector, 2e* provides authentic, hands-on experience of the decisions public administrators must face. It is an ideal casebook to supplement undergraduate and graduate public administration, leadership, human resource management, or administrative ethics courses.
