Best Sellers Rank: #3,696,944 in Books (See Top 100 in Books) #84 in [Books > Textbooks > Medicine & Health Sciences > Medicine > Clinical > Home Care](#) #277 in [Books > Textbooks > Medicine & Health Sciences > Medicine > Clinical > Nursing Home Care](#) #318 in [Books > Medical Books > Medicine > Home Care](#)

Customer Reviews

This book is good for the teaching, I have used it for a couple of years. The main reason I bought another is that in the old one some one had given me there were about 100 pages missing. I prefer a spiral bind so I can fold it back. I never thought I'd pay \$96.00 for a book, but I did this one.

Coming into a home health agency as the new Director, I found a 1997 version of this book. Since it is now 2007 I wanted to get updated information. Though it is the same edition (second)as the 1997 version,I guess I hoped for some updates, such as the new parameters for hypertension. As far as I have been able to determine thus far, nothing has changed. The quality of the teaching guide is excellent. But if you are considering purchasing this just to get an updated version, there is no need. It is identical to your the older edition.

I purchased this book to aid in my patient teaching, It is a great teaching tool for home health nurses. I have used mine so much it fell apart, and I had to place the pages in sleeves and put into a notebook, but I would not give up my teaching book for anything. Donna Meyers has an exceptional book full of practical information. Any Nurse involved in Home Health Nursing and Patient education should own a copy of this book. I only wish there were more books out there like this one.

This is a great teaching guide manual. Our agency nurses and therapists as well love the teaching tools in the book; specific disease processes, nursing diagnoses, activity and diet teaching tools! Very relevant and realistic to common home care health problems seen in the field today!! Just copy the tools you need and incorporate into teaching per the POC! Would love to see more from this author.

This book is excellent for Home Health Care Nurses with assisting you in your interventions and goals. It tells you exactly what to teach. Also has procedures and diets that are helpful for your patients.

Very informative book written in plain language. The author has organized his material in a very logical manner and gave enlightenment to certain extremely important issues of home care.

THE TEACHING GUIDE IS REALLY GOOD BUT I WISHED IT HAS MORE TEACHING ON MEDICATION SECTION OF THE BOOK
