The STREETWISE<sup>®</sup> map of Philadelphia lays all this out for you and enables you to master the city and region. ## Customer Reviews

"Don't leave home without STREETWISE" -- New York Times  
"STREETWISE is an absolute travel essential" -- Travel & Leisure  
"In a strange city, your sense of direction is only as good as the map in your hands. The best maps to carry are published by STREETWISE." --Chicago Daily Herald

STREETWISE® is the first map to be designed with modern graphics and is the originator of the laminated, accordion-fold map format. We've set the standard that every map company has imitated but never duplicated. Our mission is to make you feel comfortable, to make you feel safe in a place where you've never been before and to enable you to experience a familiar place more fully. The company was founded in 1984 by Michael Brown, who had been in international publishing for many years, setting up subsidiaries for textbook publishers. In the 1970's, Brown traveled extensively throughout Africa, India, the Middle East and Southeast Asia. Brown would take a large paper map, cut out the city center, folded it up and slip it into his pocket, thus preventing him from looking like a tourist in areas where discretion is the better part of travel. This was his tool for surviving. After many years on the road, Brown settled back in New York and decided to start his own business, based on the adaptations he had made to maps in his travels. His goal was to give someone the ability to navigate easily in unfamiliar terrain. He started with a new map format: the accordion fold. Such a simple idea, but at the time it was revolutionary. No more struggling to fold an awkward, oversized paper map. This new format would enable the user to blend in like a native, instead of stick out like a tourist. Brown then added lamination to ensure that the map would be a lasting tool. More important than the format was the design of the map itself. It had to be a map that

not only succeeded above and beyond any map he had used, but was esthetically appealing as well. The look of it had to be as striking as the functionality. Color was introduced in a way that was never seen before in a map - vivid purple for water, soothing gray for the background of street grids, gold to highlight elements of the map. Clarity, conciseness and convenience in a very stylish package. Building the business was a 24 hour job. Brown sold the maps during the day, zipping around Manhattan making deliveries on his Harley Davidson. At night he packed the orders and did the design work. More titles were added, each title requiring months of research and design. Today, STREETWISE<sup>®</sup> produces over 130 titles for major destinations, regions and countries throughout the United States, Canada, Mexico, Australia, Europe, the United Kingdom and Asia. We have grown from the back of a motorcycle to selling millions of maps around the world. Yet each title is still painstakingly researched and updated. STREETWISE<sup>®</sup> is one of the only, if not THE only map company that conducts research by walking or driving an area to ensure accuracy. After all, what good is the map if what you hold in your hands doesn't match what you see on the street sign? This lengthy fact checking results in superior accuracy; in effect, we've done the work, now you have the adventure. In the end, it's not about the map, it's about getting out and finding your own authentic experience wherever you go. It's about being in a city or a region and discovering things that you never thought you would find. You can do this if you have confidence and you have confidence if you have a great map. STREETWISE<sup>®</sup> is the great map that you need.

Unlike other "Streetwise" maps I've owned, this one is basically useless. The only useful part is the historic circuit, which is handed out for free in many locations. The big picture part is too general to be useful, leaving out, for instance, Little Italy. The routes in to Philly are complex, and the map lacks enough detail to help on the interchanges, just not good, created without forethought. Use freebies or buy a detailed city map.

I have several of these maps from other cities, and they are quite useful. one of the best things is being able to write on it with a grease pencil. you can circle each place you want to see and use the pencil to draw the route. then wipe it clean. doesn't rip like paper maps as its laminated

Great map! Once we were oriented it was very helpful and the laminated coating made it easy to use in the rain. My only complaint is that at times the print is so small (as my eyes get older). The clear balance is between lots of details in a small package so that it is easy to take with you and the difficulty in reading that can come with small print. The hotels also listed on the map made it easier

to find out bearings in relationship to the hotel we were staying at. The map fit nicely in my day pack. I also liked having it before I got to Philly so that I went in to the city knowing a bit about where we were in relation to where we needed to be.

This is only a map of Center City -- it is extensive for what it covers, but it does not go very far North or South.

I purchased this before going to the DNC in Philly, but It cuts off way before the Wells fargo Convention center and FDR Park so I couldn't figure out where any trains were to get to and from the convention.

Accurate and works well. Shows Center City, SEPTA train/subway map, and larger overview of the region. A lot of information for a compact map.

Perfect. I bought the same brand map when I first moved to New York City and it was great for getting me acclimated. This is the first one I've found for Philadelphia in this style. I just wish I could find one highlighting the transit system. Transit is included on this map, but it's small.

It is just the right size to carry with you and tells you where the important things you wish to see are located. So it's only drawback is that some of the locations are not, now, what they were when the map was conceived. But that is a small problem. GET THIS MAP.
