## Customer Reviews

I bought this book for some family member that was considering a career in medical billing and coding. I was pleased that we got this book at an inexpensive alternative. They decided the career path was not for them.... which is much better than pending thousands of \$ on classes and school. Or conversely you could find out it is for you.

Never rec'd. this item after 21+ days. I was issued a refund but does not help that I had to drop the course because of falling behind waiting for this manual. I was told I chose standard mail & it could take 21 business days. My husband worked for the postal service & believe me this never should have taken so long. I am very disgusted w/.com (my first purchase). The other manual ICD-9 came very quickly & was very satisfied w/condition of book.

Exactly what I needed for class, great price, fast shipping.

Bought it for the office. It did the job.

This was a used book and was a little more beat up than I expected but still worth the money. I'm taking online class and since I'm not sure this is field I want to do I like not having a lot of money invested in these books.

had to get this book to go with my medical billing courses that I was taking. definitely came in handy.

The book was in very good condition. A lot of information. I was able to use it for my class.

This book arrived to me in record time, and is in brand new condition. I am VERY pleased with my purchase and will definitely be back for future purchases. Thank you very much!!!
