Coronary Heart Disease & Risk Factor Management: A Nursing Perspective

Synopsis

No other book delves as deeply into the important role the nurse plays in the management of risk factors for coronary heart disease. Written specifically for nurses, it provides the skills necessary to prevent and reduce the risk of coronary heart disease and limit its damaging effects. This text helps nurses teach at-risk patients and patient populations to minimize such factors as elevated serum cholesterol, smoking, and a sedentary lifestyle. Nurses will also learn how to teach patients to help themselves through sensitization activities, patient education, stress management, and behavior modification skills training. Interventions can be used in any nursing environment...hospitals, cardiac rehabilitation programs, or outpatient settings.

Book Information

Hardcover: 327 pages

Publisher: Saunders; 1st edition (May 15, 1999)

Language: English

ISBN-10: 0721668550

ISBN-13: 978-0721668550

Product Dimensions: 10.4 x 7.4 x 0.8 inches

Shipping Weight: 2.1 pounds

Average Customer Review: 3.0 out of 5 stars 1 customer review

Customer Reviews

it is very fast delivery. As a professional chef i need and use top quality knives. I have a number of well known brands and most are high quality. This product, however, particularly because of the price, is as good or better than most all of them. I am buying now just to have at this price. Don't wait get it, or get two. just OK . great, and very happy. send it to my boyfriend ,
