This volume is an essential, cutting-edge reference for all practitioners, students, and teachers in the field of dispute resolution. Each chapter was written specifically for this collection and has never before been published. The book's contributors draw from a wide range of academic disciplines and represent many of the most prominent names in dispute resolution today, including Frank E. A. It explores how personality factors, emotions, concerns about identity, relationship dynamics, and perceptions contribute to the escalation of disputes. The volume also explains some of the lessons available from viewing disputes through the lens of gender and cultural differences. The book looks closely at the structure of disputes and dispute contexts, offers advice for creating value in disputes, using agents, and explores settlement through tools such as decision analysis. The information on law, ethics, and organizational dynamics offers particular insights into the ways that disputes are shaped by factors beyond the parties themselves. The book also contains a comprehensive review of a wide range of available dispute resolution processes. Chapters on negotiation, mediation, arbitration, litigation, and consensus building serve as perfect introductions to the field and as useful syntheses for experienced practitioners. Finally, the book explores the topics that are likely to be at the center of dispute resolution in the coming decades. Disputes now commonly arise or are resolved online, in transboundary settings, or in other nontraditional contexts. The Handbook concludes with a glimpse of the future: What will dispute resolution look like over the next thirty years? Published as part of a special series with the Program on Negotiation at Harvard Law School, The Handbook of Dispute Resolution offers the most complete and authoritative synthesis of the field available.

The Handbook of Dispute Resolution is a product of the Program on Negotiation [PON] at the Harvard Law School. It is a 520 page academic compendium of short articles on a wide range of aspects of negotiation and dispute resolution. It is not so much a handbook as it is a scholarly survey of articles on aspects of dispute resolution such as: personality, emotion, gender, culture, main types of ADR procedures, on-line dispute resolution, etc. It should be read by those looking for a broad view of the dispute resolution field. Short chapters make for sustained progress through this tome.

It's very informative. I like it more when texts have a boldface definition describing and defining things. I was required to read 5 chapters a week, so not an easy read. Also, the author likes to use five dollar words where they do not need to be and also at times, are incorrect.

This book is awesome. It really helped me in my Theories of Conflict course. I am considering purchasing this book for personal references in the future.

Perfect discussion material and well written.

Needed this for a class and still using in my education and will continue using it.

Singularly indispensable.

My book came faster than expected. It looked just as described and was in better condition than expected. Started class with all the right material.

This book is a dry read and it is an actual Harvard Law school book. You have to look for the main points in each of the chapters, mostly the reading is skimming, there are no keywords or exercises in this book.
