The Prepper's Guide To Economic Collapse Survival: How To Survive The Death Of Money And The Loss Of Paper Assets

Synopsis

There are plenty of signs that indicate our world is headed towards financial collapse. We have become dependent on paper money that is quickly losing value. What will you do when paper money is completely worthless? Will you be able to feed the family or provide shelter? How will you manage basic problems like finding clean drinking water and obtaining the things you need? These are all problems that you will be confronted with in the aftermath of the stock market crashing or a war that kills the economy. This book will take you by the hand and lead you down the road to prepping for a major economic collapse. You will have to learn a lot of new skills. When grocery store shelves are empty and the malls are closed, you have to find food and make your own clothes. When money isn't good for anything more than starting a fire, you will have to learn how to operate on a barter system. To use the bartering system, you need to know what to store today that will have high value in a world where paper money is useless. Don't get caught empty handed when the economy tanks. Get started with your prepping today.

Customer Reviews

15 minute read. This pamphlet not book is akin to a foreword in a real book. Buy non perishable food, water and toilet paper. Learn to barter with toilet paper and dried beans. Markets will run out of food. That is the point and general information presented by this pamphlet. The video advertising this book took longer to watch than the book took to read. Save your money better information is available on the web than what Henry Hill has presented here. Lots of people are searching for a get rich quick scam, apparently Henry Hill has found one.

It was a good overview, and an excellent reminder that the cash under the mattress is an asset unused for proper prepping. What I took from it was to make sure I use EVERY asset to cover as many bases as I can --- to hedge my bets --- even as modestly as buying coinage or bullion \$100 at a time. It reminded me that prepping IS for us "little" guys (modest income) as the guys who can afford to build 1220 sq ft bunkers and stock for 3 years. You do what you can, with what you have...

Not worth the money as the info is nothing I have not seen before on cable TV. Program called Doomsday Preppers

It was an interesting book but a little more basic than I thought. Would have liked something a little more in depth. If you are just starting to prep this would be a good place to start.

The book made good points, informative on whats to come and why we should prepare and got straight to the point.

Lots of information

So small.

Death of the Dollar by Henry Hill presents an interesting perspective of the future. It's rather pessimistic and somewhat extreme, and it's the reader's discretion whether it's worth considering. It's an educational book, too. It widens your perception about the possibility of a financial collapse. Nonetheless, what we read and believe dictates how we live. The choices that we make that will affect our future depend on the knowledge that we acquire. I would recommend this book as an eye-opener, however, that change is constant, and a revolution in the world scenario can happen. Bracing myself, hoping it's for the better.
