Customer Reviews

For over 35 years, School Zone has been an innovator in children's educational products! School Zone creates a wide range of educational resources to support every curriculum.

Lots of great fun actives for kids, what can a person say!

I bought this book for my soon to be 3 year old and she loves it. Since she can't reproduce perfect symbols yet, this books allows her to think and learn by using stickers. She always asks me to go do stickers and she really enjoys it. I would definitely recommend this book to the parent out there and now I am looking to purchase some additional stickers books..

Such cute bookGreat even for 1 year olds take a sticker put it in their finger and together put it on appropriate place . Don't worry it will come them doing it alone . Great language starter and skills manipulative and lots more . Important part is interaction in a good learning way .

This book is great! It does an incredible job of making learning fun. It's a good getting ready for preschool book. It covers a lot of subjects and even has some basic tracing and writing numbers. It doesn't even feel like a workbook mostly, just an entertaining sticker book. I love it! I wish they made one for all of the elementary grades.

I got this book for my daughter when she was 4 and now for my son who is 4 too. They can't get enough of the activities. They are fun, the stickers and pictures and bright and attractive to a preschooler. They don't realize they are learning, since it does not feel very boring. I can't say enough in praise of School Zone. Their books are way more engaging and cost a whole deal less than the Kumon books. My 2nd grader works on grade level math books from School Zone and she loves them too.

I used this for my 4 year old child, and she has lots of fun with the stickers. Children love stickers and this book builds on that fact by teaching using stickers. There are neat exercises such as counting, finding beginning letter, rhyming words, patterns, sequences, etc all of which ask the reader to pick up from a selection of stickers grouped by a page number. For example, A page has the 4 alphabets - I,J,K,L; the child needs to look up the available stickers for this page and paste each sticker in the box for the letter that begins its name.

Preschoolers love stickers! My son always wants to do this book! My only tip is I cut out the section of stickers and tear out the coordinating page for him.

I bought this book for my 2.4 old daughter. She loves this! We finished the book in about a week (playing "school" every day :)), now I'm buying one more, and may be more later :)). Some pages are too difficult for her, like alphabet pages (we speak language other than English at home, so I have to explain every sticker placement), but otherwise great activity. There are many "finish the scene" pages that are her favorite.
