## Synopsis

Learn to confidently manage the growing number of stroke rehabilitation clients with Gillen's *Stroke Rehabilitation: A Function-Based Approach*, 4th Edition. Using a holistic and multidisciplinary approach, this text remains the only comprehensive, evidence-based stroke rehabilitation resource for occupational therapists. The new edition has been extensively updated with the latest information, along with more evidence-based research added to every chapter. As with previous editions, this comprehensive reference uses an application-based method that integrates background medical information, samples of functionally based evaluations, and current treatment techniques and intervention strategies. Evidence-based clinical trials and outcome studies clearly outline the basis for stroke interventions. **UNIQUE!** Survivor's Perspectives help readers understand the stroke rehabilitation process from the client's point-of-view. **UNIQUE!** Case studies challenge readers to apply rehabilitation concepts to realistic scenarios. **UNIQUE!** A multidisciplinary approach highlights discipline-specific distinctions in stroke rehabilitation among occupation and physical therapists, physicians, and speech-language pathologists. Review questions in each chapter help readers assess their understanding of rehabilitation concepts. **UNIQUE!** Key terms and chapter objectives at the beginning of each chapter help readers study more efficiently.
