Customer Reviews

I've always felt a huge interest for this type of topics and how manipulation can improve your professional and social environment. I bought this book in order to learn more deeply about this matter and I found in it a very interesting explanation of mind control as well as useful tips to be applied in your life. Personally, I think that this kind of knowledge could be used to develop team management abilities and to get some benefit in a professional level. The tips and examples given by the author really help you to understand the complexity of this subject and to start a possible change in your life, based on this practice (applying it both to yourself and to others). This book gives you a great overview and I sincerely recommend it!

You might think this is a sensationalist book because the title it's a bit misleading. However, this book is a complete guide to understand how psychology can help you achieve good relationships with your family, friends and coworkers. I think the best advice this author gives is that being naïve in our relationships can lead us to a lot of emotional pain. It also teaches you how to avoid being manipulated by others but without being paranoid. This book is enlightening about this and other mind related issues.

If you ever wished to manipulate the world to your advantage, then this is the book for you. Learn various techniques aimed at bettering your life, making more money, and getting people to do what you want them to do. Author Jeffery Dawson leads the reader through a gamut of ideas in a simple and easy to follow style that lends itself well to the subject. Looking forward to reading more work by this author!

This is one skill I would like to develop for myself. There have been times when I see my friends experience so much pain and I just cannot convince them to let go of the sorrow and be free. In trying to find ways to help them, I come to understand that mind control can be useful in such dark times. I am glad I read this book.

Mind control is not about only hypnotizing someone, it's about taking control of your own mind. You will be able to understand the deceptions and manipulations that you have faced so far in your life by reading this book. You will know if you are controlled by someone or not. From basic to pro, all the knowledge that you need to learn in this subject are perfectly given in this book. You will be able to calm your mind and take the control of your own mind. Then after following all the tips and steps you will be able to control other minds also. You will be able to learn the techniques which are used by the experts. Protecting yourself from mind attacks will be easy for you. I highly recommend this book for anyone.

Who has not dreamed about controlling or even reading anybody's mind? I mean it is a really cliché topic in movies that are related with humans with superpowers and that's all for it, something that only happens in movies. Well not really, mind control is actually some kind of science and it has been studied for a lot of years and within the pages of this book you will find everything you need to know about this! It is actually possible to control and modify brain patterns from other people. Really interesting book, highly recommended! Five stars.

I didn't know anything about Mind Control. This book's subject was entirely new to me but, when I had the opportunity to buy it in an Amazon promotion, I thought it was a good read to learn something new, so I didn't doubt about it. First of all, I have to say that Mind Control is an interesting issue, maybe complex at the beginning but really helpful once you get to know it in a better way. When reading this book, people will notice a lot of information about manipulation, deception or influence, and especially how to deal with them in order to NOT being manipulated or tricked. Personally, I do appreciate those advices just to be one-step ahead of any attacker and protect me and my family equally. I do recommend this book to all the community, it can be seen as a complementary or informative read but I have no doubts people will find here useful tools to apply in daily life.

Being a person is really hard a lot of things to follow but that is for our good. But of course we should know our limitations also in communicating to others. Now, we don't know if a person is loyal to us maybe someone is a back fighter. I only trust one person that is my husband, he knows who really I'm. Some people have motive to manipulate us, to change our life and mind. Be true to ourselves do our part to others, today is full of deceit and lies. So that I'm very careful who should I

trust, and you will be my true friend all of them is not real. But , I would continue my life and do the responsibilities as a person, friend etc.
