Tom Monroe was the editorial director of HPBooks until 1987, and the Publisher of Fisher Books from 1990 through 1995.

Anyone who works on their own car should always have a couple books on the specs. this book has lots of good information you will need to rebuild your small block ford. if you're relatively new to wrenching on your own ride you better grab this one and i sugest a couple more depending on the job (different books have different pictures) to help explain things and get your ride back on the road. definitely a great buy.

I have several of Tom Monroe's books and love them. Unlike the factory manuals which are really abstract, these books are written with first hand experience of how to deal with decades-old engines - what you can get away with, what to look out for, etc.
