Layer By Layer: Discovering Dinosaurs

Synopsis

Using an innovative format, *Layer by Layer: Discovering Dinosaurs* presents young readers with six interactive scenes depicting prehistoric creatures in natural settings with atmospheric sound recordings. Each spread includes several layers for readers to peel back so they can follow the movements of the dinosaurs through the transforming scenes and answer questions about the animals' actions. Under the final layer of each scene, kids will be greeted by a surprise 3-D pop-up that concludes the narrative. The layered views provide an exciting sense of exploration for curious kids who are ready to uncover the fascinating beasts of the Mesozoic era.

Anne Rooney is a full-time author living in Cambridge, England. Before becoming a writer, she studied and taught medieval English and French literature. She writes nonfiction books for both children and adults. She specializes in subjects such as science, history, current issues, ethics, technology, early-years fiction, popular science (adult), and writing/developing writing skills. She is currently a Royal Literary Fund Fellow at Cambridge University. Suzanne Carpenter's work pays homage to folk art from across the world. She creates simple, punchy vector illustrations that have a huge appeal among young children.

Bought three "Layer by Layer" titles for the kids thinking the sounds and flaps would be fun and educational. NONE of them worked (made sounds when flaps moved/ were lifted). I ensured the pull tab was removed, switched the switch back and forth several times, and checked the batteries- still no sound. I had brand new 1130 batteries (still in the blister pack) and swapped the batteries- still no sound. Books have decent illustrations and basic information, but without the sounds- they are overpriced and underperforming.
