The Herbal Medicine-Maker's Handbook: A Home Manual

Synopsis

THE HERBAL MEDICINE-MAKER'S HANDBOOK is an entertaining compilation of natural home remedies written by one of the great herbalists, James Green, author of the best-selling THE MALE HERBAL. Writing in a delightfully personal and down-home style, Green emphasizes the point that herbal medicine-making is fundamental to every culture on the planet and is accessible to everyone. So, first head into the garden and learn to harvest your own herbs, and then head into your kitchen and whip up a batch of raspberry cough syrup, or perhaps a soothing elixir to erase the daily stresses of modern life.

Customer Reviews

JAMES GREEN is the founder of Simplers Botanical Company and is a professional founding member of the American Herbalists Guild and United Plant Savers. He conducts workshops on male health and herbal medicine making throughout the United States and Canada. He lives in Ocean Beach, California.

What a great read. Every page is packed full of information. James Green has been at this for a long time ~ and he still has the passion to help others learn this wonderful craft ~ you won't be disappointed ~ you need this ;-)

One of the best books I've gotten lately. It is so packed with information and is witty and a joy to read!

Absolutely essential book for every herbalist, from beginner to beyond. So excellent I have it in two formats, paperback and Kindle edition. :) Easy to read, simple to reference, lovely art nouveau chapter pages...seriously, why are you still reading this? Go buy the book already!

Very chatty but informative. I have been comparing the tincture formulas with those of Richo Cech, Making plant medicine, for the most part they are pretty close but Cech gives more information. I bought this in book format rather than digital and am glad I did as I find myself skipping ahead and back a lot as the information is more scattered than in most books. I would definitely recommend this book as part of an herbal collection.

If you are a beginner or a novice, this book will be a huge help. He gets into all the details about many choice herbs including when to harvest, what tools to use, methods of extraction, and great charts for easy reference. The way he tells you about all those details is very smooth and interesting - not dry. His writing style will keep you engaged, which is hard to find in a reference book. All around GREAT BOOK ON HERBS!

I sit somewhere between the upper and lower ratings on this book. I did kind of expect a pharmacopeia type of book, but for me as a beginner, this has a lot of practical, how-to knowledge that I don't have to look elsewhere to find. Having only leafed through the book, it appears that he gives practical, start at the beginning instruction on setting up your own natural pharmacy (plants), and then how to understand and use them. I like it!

So much more than I expected. Not sure what else to say...if you have any interest at all in the topic, give this book a try. The author's conversational manner is actually really nice and not self-indulgent or anything like that, which is a nice change. The information presented is excellent, and if you don't mind really reading through text rather than just cookbook-style lists, you'll get a lot out of this book.

a well written book
