WARNING: Don't Get Into The Jungle Of Your Own Business Without This GuidebookJeff Steinmann had a legitimate high-level corporate career going. He could have sailed on with relative anonymity, good salaries, fairly interesting projects, and nice people to work with. But he wouldn't have been HAPPY with that. Are YOU in this situation? Comfortable but disgruntled? Well aware that you are doing about 20% of what you \*could\* be doing? But afraid to take that big step to go out on your own? Jeff gets this. He didn't leap into his own business the moment he got the notion--it took him \*years\*. And those years, and the experience he had with them, will save you tons of time and accelerate your own plans. Everything he learned he's passing on to you with this book. This is practically the Lonely Planet guide to successfully traveling to the unknown country of starting your own profitable company. Actually, it's more than a book. It's a roadmap. Complete with waypoints and can't-miss locations. Links inside give you worksheets so you can determine for yourself, with his expertise alongside, what your individual plan will look like. Exactly how you will make that step. Now I've been running my own business for years. And I sure wish I'd found Jeff's book earler, because even though I'm already doing it, there are many areas in which Jeff's advice continues to be valid and very helpful in growing that business. My corporate career was fine; I was a plant manager at 25, and have had several senior management roles in which I've supervised over 150 people. Now I am using the book to reshape how my days look, because after a couple of years of evolving my sales training business, I find myself trying to do too many things at once. He uses the metaphor of putting up a building for making your business come alive. Foundation first, then putting up the structure, then raising the spire on top. The first section is all about the mindset and requirements for carefully and intelligently stepping out to create your own business. 13 critical decisions you must make are explained. If you're genuinely afraid to make the leap, this section will explain how to do it without much risk at all. (Hint: do NOT quit your job without a safety net!) The next section is for creating the blueprint for your business. Who will you serve? What will your day look like? How will you make money? And with the links I mentioned, you'll have everything you need to develop that vision. This is so important, I can't overempahsize it: if you don't have this clear vision, you \*will\* screw up and fail. Following this, Jeff discusses outsourcing, processes, systems and more to make your life as a business owner much easier. Fact is, there's a lot to this stuff. You probably know that, since you've likely been working at corporate jobs for awhile and have gotten the picture "from the inside". With Jeff's help here, though, it isn't overwhelming; he breaks

everything down into understandable and manageable chunks so you can deal with each piece correctly from the start. If you've been running your business for awhile, you'll get loads of tips for re-directing your efforts. Frustrated with how your days go? Disappointed with the amount of money you've been making? Not spending enough time doing the things you want to be doing? How To Quit Working will give you the tools to make those changes you desire. And probably get you thinking about things you haven't considered. This is the best manual on how to make the jump into your own successful business that I've found. If you haven't yet made that leap, but are yearning to, you will get that virtually risk-free plan to do so. If you already run a business, you will nod and smile at the first section, and then start rethinking how you're doing what you're doing because of what you read next. Don't miss it.

Jeff Steinmann's book "How to Quit Working" is not just for beginners! I've been working as a free-lance graphic designer for over 30 years, but with the changes in technology and the economy I had lost focus. When I started reading Steinmann's book I didn't realize that I was ready to rethink and refocus my work. He had me at his intro. All the while is Steinmann tells his own story in the introduction, he is leading the reader to think about their own paths to creating their personal dream business. I found it difficult to fill out the the "Evaluation View". I really had to work on: who am I; what I want my life style to be; and the steps I need to take to reach my goals. Steinmann's line, "Never abandon course  $\tilde{A}f\hat{A}\phi\tilde{A}$   $\hat{a}$   $\neg\tilde{A}$   $\hat{a}$  • adjust course", really hit home, helping me think, evaluate and realize where I need to put my energies. Way to go Jeff, you've packed powerful thoughts and guidance into your book!
