Have You Considered: Evidence Beyond A Reasonable Doubt

Synopsis

Have You Considered is the third in a series of unique devotionals which present the evidence for creation from every area of science. 365 different examples of how well science supports a biblical model for our origins are presented. Topics range from biology to geology, genetics to botany, anatomy to history, design to microbiology, Christian truths to cosmology. This book is marvelously illustrated with over 200 color illustrations. It is written in a style that is appropriate to be read to even young children yet profoundly enjoyable for adults. The book also contains extensive references and includes topical, Bible verse, and subject indexes. It is a phenomenal source for homeschoolers, Christian parents, or anyone wanting to know more about nature or creation. (Julie VonVett)

Customer Reviews

Julie Von Vett has been teaching creation science and worldviews since 2003 to homeschoolers and doing seminars at churches and community events. Julie has been teaching creation science to church, home school, and community groups full time since 2003. She literally has 500 students all over the state of Minnesota! Prior to this, she home educated her children, Annette and Caleb, through high school. After attending worldview classes at Summit Ministries in 1992, she began teaching year-long worldview classes to high school students and parents. She realized that the foundation of a biblical worldview begins with creation, Genesis 1-11. Julie has received her B.A. from St. Olaf College. She lives with husband Vince in Minnesota. In their free

time they love to travel out West and explore the geology from a creationist perspective and dig dinosaurs. Bruce has 27 years of research experience with the Dow Chemical Corporation but left in 2008 to act as full time Executive Director of Search for the Truth Ministries with the vision of "Awakening Hearts and Minds to Biblical Truth". This organization widely distributes his Bible-affirming creation materials to students and prisoners. Bruce has a B.S. degree in Chemical Engineering from the University of Cincinnati and holds 17 patents for new products with Dow Chemical. Bruce Malone has spent the last 30 years bringing the scientific evidence for creation to churches and colleges at seminars throughout the United States and 12 foreign countries. He has also authored six books on the evidence for creation with over 200,000 copies in print; served as adjunct speaker for the Institute for Creation Research; is an associate speaker for Logos Research Associates Inc.; and is a commissioned worldview speaker under Chuck Colson's Centurion program - bringing a recent Biblical creation understanding to worldview issues. Bruce and his wife Robin have been married for 32 years and have four grown children and three grandchildren. They reside in Midland, Michigan.

This book is basically good. Unfortunately, it contains several provably incorrect entries, probably due to inadequate vetting of sources. I will be contacting the authors with comments.

This as well as other two books preceding this book are just AWESOME! Yet due to being in color this one is especially impacting. It shows Beyond a shadow of a Doubt the "theory" of evolution taught as fact fails when its gets exposed when put to real test of science and not speculation and just so stories evolutionist admit to teaching. I couldn't recommend more highly!

Good but admit some days the subject gets a bit deep, maybe over my head.
