Polar Obsession

Synopsis

The Arctic is in Paul Nicklen's blood. Born and raised on Baffin Island, Nunavut, he grew up in one of the only non-Inuit families in a tiny native settlement amid the ice fields, floes, and frigid seas of Northern Canada. At an age when most children are playing hide-and-seek, he was learning life-and-death lessons of survival: how to read the weather, find shelter in a frozen snowscape, or live off the land as his tribal neighbors had done for centuries. Today Nicklen is a naturalist and wildlife photographer uniquely qualified to portray the impact of climate change on the polar regions and their inhabitants, human and animal alike. In a wise and wonderful intertwining of art and science, his bold expeditions plunge him into freezing seas to capture unprecedented, up-close documentation of the lives of leopard seals, whales, walruses, polar bears, bearded seals, and narwhals. Bathed in polar light, his inspiring and amazing images break new ground in photography and provide a vivid, timely portrait of two extraordinary, endangered ecosystems.

A large female leopard seal greets photographer GÃfÂ¶ran EhlmsÃfÂ©. Anvers Island, Antarctica
A young polar bear leaps between ice floes. Barents Sea, Svalbard, Norway
A kittiwake soars in front of a large iceberg. Svalbard, Norway
Narwhals dive deep under the ice to feed on Arctic cod, then return to the surface to breathe and raise their tusks high in the air. Lancaster Sound, Nunavut, Canada
Mother bear and two-year-old cub drift on glacier ice. Hudson Strait, Nunavut, Canada

A gentoo penguin chick peeks, checking for patrolling leopard seals before tempting fate. Port Lockroy, Antarctic Peninsula
A leopard seal feeds Paul Nicklen a penguin. Antarctic Peninsula
A large bull walrus returns to the shores of Prins Karl Forland after diving and feeding on clams. Svalbard, Norway
Looking towards an uncertain future, a huge male bear triggers a camera trap, taking his own picture. Leifdefjorden, Spitsbergen, Norway
In the Arctic spring, meltwater channels drain toward and down a seal hole, returning to the sea.

Paul Nicklen has been published in magazines around the world, including ten articles for National Geographic. He began his career as a wildlife biologist and took up photography fifteen years ago with the desire to bridge the gap between scientific research and public knowledge on wildlife subjects and climate change.

Binding fell apart almost immediately. Great photos.

This is a wonderful book

Beautiful and inspiring almost beyond words Paul Nicklen has produced a book that stays in the minds eye long after the first look. I no doubt will dream of seals and bears for weeks to come. Well written and photographed with a skill and passion expected of a National Geographic photographer Paul Nicklen has really done it proud. What I wouldnt give to have been there myself is the feeling you get. What more could you ask for in a book?

I got this as a gift and it was a fantastic success. The pictures are gorgeous and the text is interesting, its truly a one of a kind book. I did a lot of research and this book contains photos you cant find anywhere else...TIP: If you know someone who likes narwhals, this will leave them speechless...don't even look at anything else, this is what you should buy for them.I HIGHLY recommend this book. As an animal lover with a great appreciation for photography, I consider this to be one of my all time best purchases.

Fantastic! Loved it!! enjoyed reading this book so much. I was sad when I finished it.The book has gorgeous photographs and interesting text. I particularly enjoyed the part about a leopard seal trying to feed Paul Nicklen. It was also very interesting to learn about life and survival in the polar regions.

This book has some amazing shots of some magnificent animals, mammals and birds. I bought this for my dad for christmas because he loves National Geographic, as well as nature and wildlife. He is a long time Alaska resident and worked on the water for many years. I found him lost in this book many nights when I was home for christmas.I would definitely recommend this book to anyone who appreciates photography and wildlife.Ã Â Polar Obsession

Paul Nicklen is one amazing man and an outstanding photographer. The book is such a superb quality item that I highly recommend it to anyone into wildlife, animals, photography, adventure or whatever gets you going. Not only does it contain loads of beautiful images but these also come with very interesting texts and explanations. I am very happy that books like these exist! Thank you Paul!

Heard the author on NPR and bought it as a Christmas present to my husband and myself. It is a beautiful coffee table book; it is quite large (approx16x13),so it would not travel easily. The pictures are awesome! From listening to the author on NPR he tells how the pictures are taken, which is amazing! I have just started reading it and I am sure it will be well worth the read. A in AZ.
