Customer Reviews

The holidays are over and it's time to get back on a healthy diet. I purchased this to get some new recipe ideas and was not disappointed with what I've got. The explanations to the keto diet are an added bonus. If you just want to have a healthy lifestyle, but not necessarily follow the ketogenic diet plan, you can still pick great recipes from here a few times a week.

Preparing meals for my family can be difficult when you're running out of ideas especially when you are considering healthy and tasty dishes. With this Meal Prep, it includes basic and new ideas on how to help you prepare your meals in a quick and easy manner, utilizing ingredients and more importantly, being on a budget too. A good book to add to my recipe collection.

This book is really helpful especially to those busy individuals who have limited time to prepare and cook their food but still want to have a healthy meal for weight loss. Really great book for beginning meal preppers. I have really enjoyed all recipes and also the money saved since this book is very budget friendly as well.

I love doing meal prep but really needed extra help and ideas. I've been stuck on the same stuff for awhile and really needed to expand my meal prep skills. I've learn that in this method, freezing instructions are very important. Low-carb recipes included in this book are all healthy and help you lose weight.

This is an ultimate cookbook. From this book you will learn what meal prepping is and how to do it properly in a step-by-step fashion, the many benefits of meal prepping, common mistakes that people make when they first start to meal prep and how to avoid them and much more. I hope you need this book very much.

Does not give you any "REAL" meal prepping information...this is more a recipe book than anything. The information in the beginning is incorrect regarding ketosis. This author really should do more

research on ketosis before writing misleading and incorrect information. We are not required to eat carbohydrates....our bodies naturally produce carbohydrates. Processed or starch carbohydrates are not REQUIRED to be added to our diet. Yes, carbs are necessary, but our bodies do it on their own. Carbs actually cause BRAIN FOG, LACK OF ENERGY, and INFLAMMATION. RESEARCH RESEARCH RESEARCH

This book is an amazing guide book for weight loss and a healthy life. This book is a helpful guide book. It has a lot of tips on how to prepare the meals with the help of some kitchen equipment. The recipes contained in this book are very easy to make and taste.
