## Customer Reviews

Includes Directed Reading Worksheets, Vocabulary and Section Summary Worksheets.

Great book to use for my home-schooled 5th grader. I use it to supplement other material to teach my son about science. The book skims on important topics. It asks review questions at the end of each chapter. It goes over key vocabulary words from the chapter. I recommend this book.

This book was very helpful for homework completion. My daughter's school requires this book and, rather than have him carry it back and forth, I bought this one for an extra copy at home. It is very helpful when completing the reading selections and homework questions that are required for her class. The book has very nice graphics and is colorful to keep the attention of my 7th grader.

This book helped my needs in middle school to excel far beyond the class and learn material covered in high school. This book helped explain advanced material in great detail. I used it to gain information for general knowledge, and to study for competitions. It covers ecosystems, the 6 kingdoms of animals, evolution, cells, human body systems, and classification. This is a must by

book for anyone in grades 1-9 looking to gain knowledge on life science.

The book has very nice graphics and is colorful to keep the attention of a middle schooler.

This textbook navigates you easily and clearly through topics. You can skip or switch them. Also, there are some good simple ideas about the science projects. Moreover, I love the colored pictures, but it is me!

Book is in great shape and exactly as described. I can't wait to get started using it next week!

Book was exactly what my family needed.
