Grade 7-10 • Nardo does a good job of defining the social hierarchy that represented the European medieval world. At the uppermost, kings and popes battled it out for top position. At the bottom, serfs toiled hopelessly, and no women had real rights. Indeed, one husband bragged to his buddies after having kicked his wife in the face, breaking her nose. Knights and the clergy made up much of the rest of society. While information on knights is abundant elsewhere, material on the church and its minions is not quite as ubiquitous. Clerical divisions are fully clarified here. As explained, at the end of the Middle Ages, merchants and scholars began to rise in importance. The writing is compelling and full-color, contemporary pictures complement the text. This comprehensive, well-organized, and worthy effort is especially useful for reports. • Anne Chapman Callaghan, Racine Public Library, WI Copyright © Reed Business Information, a division of Reed Elsevier Inc. This is one of Nardo's several excellent volumes on European medieval history and culture aimed at

younger readers. Others include studies of medieval pilgrimages, weapons, castles, the black death, and art and architecture. In all of these books he can be depended on to present sturdy overviews of the topics and presentations of the basic facts in each sub-genre. This one- on people in the various social classes in Europe in that era- provides students with plenty of good material for reports, as well as valuable information for anyone, including an adult, who is interested in reading a general introduction to the topic.
