Customer Reviews

This is a great product if you like Battletech. It adds a fairly large number of maps that can be used either for it's intended purpose (arena-deathmatch) or as regular terrain in your normal Battletech games (although not perfectly, they still look arena-ish). It features a fairly comprehensive book about Solaris IV and the arenas, as well as some new weapons. The main feature for me is that I now can play custom-mech deathmatches without thinking that it's inappropriate "in-universe" as that is exactly what the arenas are for in the battletech universe! Great product, 5/5

The Solaris VII Map Pack contains some neat maps and gear but not the 'Mech dueling rules found in the old Solaris VII boxed set. It is just a shameless attempt to cash in on the old boxed set while using standard Battletech rules.
