# Vaccines 2.0: The Careful Parent's Guide To Making Safe Vaccination Choices For Your Family

## Synopsis

The CDC's bloated vaccine schedule has doubled since 1988, after the federal government gave pharmaceutical companies immunity from lawsuits. Autism and other childhood disorders like asthma, ADHD, juvenile diabetes and digestive ailments have skyrocketed. And parents are understandably nervous, desperate for objective guidance that takes those concerns seriously. *Vaccines 2.0* looks at the lengthy roster of today's recommended injections, the documented risks that accompany them, and helps parents choose a schedule based on unbiased, uncensored, unconflicted science. From whether to get a flu shot during pregnancy--and how to avoid dangerous mercury if you do--to the Hep B shot within hours of birth, to the controversial Gardasil vaccine for preteens, *Vaccines 2.0* provides the tools to decide for yourself. The three sections cover: Why should you care? What should you know? What can you do? The exclusive Risk-Reward Assessment assigns a numerical score to each of the 14 recommended vaccines. Also included is information on learning to spot, report and treat side effects; talking to your doctor and finding a sympathetic one if you can't, and comparing alternative schedules if you decide to delay or skip shots. When it comes to your child, it's your choice. *Vaccines 2.0* will give you the information you need to choose wisely.

Mark Blaxill is the father of a daughter diagnosed with autism, co-founder of the Canary Party, and editor at large for "Age of Autism." He has authored several scientific publications on autism. He received his A.B. from Princeton and an MBA from Harvard. He co-authored the book, "The Age of

Autism." Dan Olmsted is co-author of "Age of Autism" and Editor of the blog of the same name. He was an original staff member of USA Today and Senior Editor for USA Weekend magazine and United Press International. He is a member of the National Press Club.

Refreshing, intriguing, and empowering. Vaccines 2.0 is a reference book, a Consumer Affairs Report, and a survivor's guide for the next generation. At its core is a shot-by-shot risk/benefit rating plan. Then a section that takes the CDC-mandated vaccine schedule apart and shows how to put it back together to meet your family's needs. Along the way, Blaxill and Olmsted reveal the mandated vaccine schedule to be a Winchester mystery house, under construction for generations, no master plan. I was fascinated by the history of the various add-on wings, secret passages, ghost rooms, and behind-the-scenes stories of how this gerrymandered maze of a mansion was built. Yes, vaccines save lives. And damage lives. I wish I'd had this book when I needed it. Especially the brief, penultimate chapter, "How to Prevent Vaccine Injuries," which distills decades of lessons learned the hard way into practical pointers. With this book in hand, I could have mapped a safer path toward a healthy future for my son. Pregnant? Sister, daughter, friend expecting? Grandchild on the way? Protect their future. Get your hands on Vaccines 2.0.

This book is a must-read for all new parents. Incredibly informative without being overtly anti-vaccine and contains vital information for anyone who questions their vaccine choices. I am so glad I purchased and read this book!! I cannot say thank you enough to the authors for compiling information that is difficult to find in this format elsewhere.

This book was very helpful in guiding me on how to find the middle ground between no vaccines and "The recommended schedule". If you are wanting to be well informed this is a great easy to read book.

I recommend this book for everyone interested in learning more about vaccines and the illnesses they "fight". I started reading about the subject with Dr. Sears' "The Vaccine Book", but this is much more detailed about ingredients and effectiveness of shots.

Best book ever

Not nearly as one sided as most books on the subject. Would recommend every parent reads. Being informed is the most important thing as a parent.

Great book! Parents need to be informed about vaccines, and this book provides essential facts.

all parents should read this book
