First 100 Numbers

Synopsis

Your little one will love to learn about numbers and counting with this bright board book. There are interesting photographs to look at and talk about, and labels to read and learn, too. The pages are made from tough board for hours of fun reading, and the cover is softly padded for little hands to hold.

Book Information

[> Early Learning](#) [> Basic Concepts](#) [> Counting](#)

Age Range: 1 - 3 years

Grade Level: Preschool and up

Customer Reviews

Roger Priddy's passion for educating children through fun, informative and engaging books has led him to create some of publishing's most enduring and successful nonfiction early learning books. Roger lives in London and has three children, who have been the inspiration behind many of his best publishing ideas.

This book is huge. My 17-month-old picks it up, but sometimes struggles. I was expecting a smaller version (similar to the Words boardbook). And as other reviewers pointed out, only the last page shows numbers above 12. I also noted the use of the word "fruits" (as in, "how many green fruits?" (which would refer to different kinds of fruit--meaning that there is more than one type of green fruit: a lime, a green apple, etc.). Fruit is the same in plural form; thus showing two green limes is two fruit, not two "fruits"). Proper grammar is important to teach at a young age.

Bought this as a birthday gift among 5 other books for my just made 1 year old nephew. His mom reads to him right before sleeping every night and I believe he will learn many things from this book. His mom loved this and the other 5 books I bought for his birthday.

this will be a very for good first book for any child that has any interest in books. It will be a good book to sit down with the child would be able to answer questions and provoke questions of your own, such as do you know what this number is, you know what this letter is you know what this thing is, it will be something that will keep a child entertained for very long time

We bought this because we were gifted with the "first 100 words" book. This number book is a hit- its colorful, we love board books to encourage the child's independent scanning, and it has simulating examples.

I love this book! My grandkids, ages 20 months to 4 years can use this books independently and together! It's fun to sit with them and watch as they learn. They are simply fascinated by the pictures! The 4 year old is learning and reinforcing what she already knows which in turn encourages the three year old to follow suit.

My nephew loves it. It's bright and colorful so it keeps his attention. Very useful teaching numbers.

This book is so colorful and fun. My kids love Roger Priddy books. They are amazing learning tools for young learners!

Cute book! Very good quality, not expensive at all and I can't wait to use it when my son is old enough.
