## Customer Reviews

I had this crazy dream to get all of my musician friends together and play the "B" side of Abbey Road at my 50th bd party so I ordered this music. I have to say that that it exceeded my expectations, especially with regards to the vocal parts. We actually pulled it off, including the three-part harmony on "Because", which we pretty much read right off of the page at the party. The main reason I ordered this, however, was so we could nail the transitional section in "You Never Give Me Your Money", and the chord changes are spot-on, as well as the tabs. My only knock on this collection is a the lack of a piano part, which seems a little strange given the heavy keyboard emphasis on some of these tunes. Luckily my keyboard player was a real pro and could play them by ear, but if you are going to perform Abbey Road you will need more than this volume to make it happen. And just to clarify about the vocal notations, it is more than adequate but it is not exhaustive. The major harmony parts are there but all off the "ahs" and "oohs" (i.e. "Bathroom Window") are not. Having said all of that I recommend this volume if you are going to jam out to the Beatles!

These are great transcriptions, just as Paul played them, and if you can master these, you're doing very well indeed - among his very best. It'll help to look up the 'isolated bass' parts on youtube while learning the tab.

I'm not heavily into the Beatles, but I always wanted to learn some of the songs from this album (especially Something). This is an excellent book in terms of accuracy when put up against the recording. Some concessions had to be made because of the multi-tracked guitars, but overall it saved me a lot of time trying to Tab out songs that were heavily produced making them hard to decipher. Highly recommended.

nice transcriptions

Awesome job. Now start cracking on doing a bass book for "The White Album".

It arrived promptly. well-packed and exactly as described. Thanks!

While this book is not 100% accurate as I had wished it were, it is still very close however so I do recommend it for anyone who wants to learn the bass from this amazing album. Now I wish they would release the other Beatles album in this Bass recorded series.

Very good book, really pleased!
