Customer Reviews

I really enjoyed this one. Story keeps moving along and everything has a purpose to the narrative. Found myself needing to pace myself rather than reading it all in one sitting. Just so I could better

enjoy and reflect on it. That being said, I'm sure I will read this one again in eager anticipation for part 2. It is certainly a must read after this, I'm hooked.

Fabulous new writer. Excited to read his second book to this series! loved the prologue, but the characters in his story really captured my attention! Well thought out and well written!

Kept my attention and fast paced. Look forward to the remaining parts of this series. Nice start D D Godly.

The Earth is just one planet in the millions that occupy the galaxy. It is special in that it supports life, not just Terran life, but other forms as well, even alien ones. Unknown to Earthlings, the protection of the planet and its life-sustaining capacity are far more important than the humans who would call it their own. The story switches back and forth between first contact in 1947 and the alien return in 2020. We learn slowly the purpose and possible fate of humanity as the story unfolds. The earlier time is when the military is trying to make sense of a captured spacecraft and the one alien survivor. The later is about the mysterious disappearance of two teens, literally vanishing into a cloud of smoke. The mystery deepens as strange crystalline tree-like structures appear all over the world. Their purpose is unknown. Some claim it is the beginning of the Rapture, others a war on humanity and still others, just an unknown natural phenomenon. There are so many new and interesting ideas and reasons to like the story, unfortunately, the action is slowed with lengthy descriptions of unimportant minutia. The story is seemingly just getting warmed up when it abruptly ends in preparation for its sequel. The audio is performed by Nik Magill who does a generally good job. He has a pleasant voice and is easy to listen too. The characters are clearly defined. It is subtle, but there is a kind of jaunty tone to his voice lightening the story. It may or may not be appropriate to the story, there is not enough of the plot to know how things turn out to say for sure. This is clearly book one in a series. It does say part one of two after-all. It is under four hours long, so this seems unnecessary to split it into two parts, but that is what the author decided. It is somewhat unfair to judge only half the story, but that is what is currently available. In which case, it is difficult to recommend at this point. There are many interesting elements and ideas. Perhaps it is better suited as a young adult novel as the main characters are teens and their inept parents. Audiobook was provided for review by the author. Please find this complete review and many others at my review blog [If this review helped, please press YES. Thanks!]

I wasn't sure where the author was going with this, but I'm glad I hung in there. I am still a bit confused. Maybe there is more to come? I first gave this a three star review by mistake. I meant to give it four. I think if the author developed the story a little more carefully and explained some things a little more clearly I would have given it five! I'm still a little confused, however. I do find the concept very realistic, actually. We are in trouble as a species...

I thoroughly enjoyed reading this book! The pacing was great: there was never a moment where I felt the narrative was simply plodding along until the next exciting part. The author really captured my imagination and did not let go, revealing just enough to leave me in eager anticipation of the next entry in the series which promises to be huge.

There are a small minority of books that I have read that I would classify as "True Page Turners". This book is one of those. This is an excellent read, and a unique twist on things. I was extremely impressed. The only bad thing is when I checked, the second book is not available yet. I'll be waiting!

Seems we have no ownership of our planet...an alien maybe? Whoever or whatever are extremely unhappy with humans. Evidently having acquired Earth from another species they are here to fix the problem. Was area 51 really true? Where are all the missing people who have been abducted? Being reshaped or reformed? Different kind of book but very entertaining...
