Kings Over Aces: The Insider's Guide To Angel And VC Investing In The Next Billion Dollar Startups And IPOs

Synopsis

"The Best Book on Angel Investing and Venture Capital for Startups!" Are you an startup investor, venture capitalist or entrepreneur in VC? Or are you an investor who wants to get into venture capital and startup investments? What if you had the opportunity to be a startup investor in the next Facebook, Uber, Google or Airbnb? Now, you can invest in top startups and entrepreneurs like Elon Musk, Steve Jobs and Bill Gates. For years, angel investing and venture capital have been behind closed doors with the same individuals and VC firms getting access to top deals. The majority of accredited investors had no idea how to get in or how to get access to these deals until now. Kings Over Aces gives you an inside look at how you too can invest in startups and put your investment capital to work. We show you how to invest in startups from incubators like Y Combinator, 500 Startups, TechStars and AngelPad. There are many billion dollar startups across the country waiting for entrepreneurs like you to invest. You will also learn about Kings Over Aces proprietary formula on startup investing. This secret formula is changing the way private equity and venture capital investments happen. Whether you're a new angel investor, venture capitalist, accredited investor, private equity investor, startup founder, or just someone who wants to learn about the hottest emerging deals and how you can get access, read Kings Over Aces you might just make a lot of money investing in companies you love. If you've been sitting on the sidelines, it's time to get in the game. Instead of hearing about that next big deal and how your friend made money because he invested "early in X" now is your time to profit from the astronomical rise in startup and Venture capital investing. Entrepreneurs are ready to meet venture capitalists just like you. We discuss investing concepts like the Lean Startup method by Eric Ries, discuss how to beat investors from shows like ABC's "Shark Tank", and provide detailed analysis of startups metrics such as cash flow, revenue, burn rate, exponential growth and company valuations. In addition, we analyze startups from Angel List, which is a growing platform for investing under the SEC's JOBS Act. You too can be the next billionaire startup investor. With our investment guide on startups and venture capital, the secrets, myths and legends are revealed. We want to help both startup founders and startup investors connect using our intelligent investing formula.

Customer Reviews

Riveting and informative book about the VC and start-up world. I considered myself to be somewhat educated about VC and angel investing, but after reading *Kings Over Aces*, I have much more knowledge about the industry. The book gives great examples about the industry and really shows the reader how they can take advantage of the start-up world, finding the correct company to invest in. I would highly recommend this book to novice, intermediate and professional persons in the start-up world.

Blankenship's book on venture capital, angel investing and startups is absolutely perfect. One of my friends told me to read *Kings Over Aces* which he called one of the best guides to investing in startups. He was right. From the personal story and narrative about how Blankenship got into investing to the startups and companies that he ranks, this book is top-notch. *Kings Over Aces* is never dull. Each page teaches you something new about startups and the hottest companies. Doesn't matter if you're an amateur or professional investor, you'll learn so much about startups and venture capital with this guide to venture capital and investing in startups. Note though that there's so much information that it can take a few days to read it, but other than that, what a joy to read. I'm so glad my friend recommended this book and believe it could help anyone better understand the fast paced world of venture capital and startups.

Venture Capital investing has always been a close-guarded secret with investors sharing very little information with "outsiders". Even accredited investors have been shut out of the lucrative billion dollar VC markets with little chance of getting a look in. Being a successful VC investor himself, Blankenship opens up the doors to this market with his insider information on how you can invest in start-ups. He also gives valuable information for entrepreneurs on how to manage their ventures to take them from a good idea to billion dollar corporations and shows them how Angel and VC investing can get them there.

Just finished reading this book on angel investing, startups and the VC funding that is fueling our technology boom. I'm new to the world of investing and was reluctant to get started, but this book is a great start. I did read David Rose's book and also Venture Deals by Brad Feld. Those are very solid too. What I like about this book by Blankenship is that he puts a personal touch on the ups and downs of building a startup and relays his advice on investing in a personal way.

The first 20 pages are an advertisement for his "Angel Group" and the rest is recycled startup folklore garbage lifted from the web. Take a big pass and a hard look at Top Test Prep on Glassdoor and BBB.
