Textbook Of Biochemistry With Clinical Correlations

Synopsis

This book presents a clear and precise discussion of the biochemistry of eukaryotic cells, particularly those of mammalian tissues, relates biochemical events at a cellular level to the subsequent physiological processes in the whole animal, and cites examples of abnormal biochemical processes in human disease. The organization and content are tied together to provide students with the complete picture of biochemistry and how it relates to human diseases.

Book Information

Hardcover: 1240 pages

Publisher: John Wiley & Sons; 7 edition (January 19, 2010)

Language: English

ISBN-10: 0470281731

ISBN-13: 978-0470281734

Product Dimensions: 8.5 x 1.8 x 11 inches

Shipping Weight: 5.4 pounds (View shipping rates and policies)

Average Customer Review: 3.9 out of 5 stars 32 customer reviews

Best Sellers Rank: #42,108 in Books (See Top 100 in Books) #8 in Books > Science & Math > Chemistry > Clinical #19 in Books > Textbooks > Medicine & Health Sciences > Medicine > Basic Sciences > Biochemistry #81 in Books > Engineering & Transportation > Engineering > Bioengineering > Biochemistry

Customer Reviews

Good book, exactly what I needed for my masters biochem class.

The pages in the book are upside down and the back of the book is where the 1st chapter starts.

I ended up receiving a textbook about the US prison system, and not a biochem textbook, so there's that. I'll update my review when I receive a biochem book.

I really liked this book. The concepts are very in-depth and definitely recommend it for advanced courses like Metabolism concepts including-Glycolysis, Krebs cycle and Oxidative phosphorylation, lipid metabolism

excellent book of biochem which links clinical biochem with the actual biochem. exceptionally well

written,with easy flow. Its one of those rare books in medicine which ticks all the boxes.well suited at all levels,espically for all those who are pursuing to be a physician.

IT IS REALLY GREAT

It was easy to follow a good book

Great book! Helped me so much with my master's program.
