Medical Office Management And Technology: An Applied Approach

Synopsis

From A to Ziesemer, Medical Office Management and Technology is the text to help student's navigate through their medical office management courses, whether as part of a health information technology, a medical administration, or any other allied health program. This text starts at the beginning, with an introduction to new students not familiar with this topic, and works through even the most advanced topics in medical office management. With a special focus on leadership, and a logical progression through the topics, this has the makings of a faculty member's most trusted resource for this course.

Customer Reviews

I rented this book because I figured it would be the cheaper route. My instructor did not specify that we would need any online access, so I figured everything would be fine. Thankfully, I rented this when the price was cheaper (~\$16), because after my first class, my instructor mentioned that we need the access. After looking at the Point's website... I'm pretty sure (for this book at least) that they do not sell individual access like most other company's do. Basically, now I have to purchase the book brand new, because I need the access code and my class is heavily graded on the Harris CareTracker assignments.

This was required for a class I attended. A con about this text book is, when it is referencing a URL, it spells out the complete URL in the middle of the paragraph instead of off to the side of the page,

as I've seen in other books. For example, almost a whole paragraph was nothing but a URL besides 2 sentences.

This book doesn't come with an access code. I want a refund on this rental. I ended up renting this book with an access code at my college.

Very good book

I like how the workbook is included in this book
