This is a fold out guide and map of the city and indicates where the Tube locations are. This is great when trying to figure out which stop to get off. It's sturdy and pocket size.

Good for Trip planning

Was helpful in getting around. Underground spots were marked, but a few times they weren't necessarily obvious on the map. Check the route lines in the tube to be a little clearer, then check the map to see where the stops actually are geographically. The tube maps don't really let you know how far or close to your destination you might be, and in those instances this map was Very Helpful. Otherwise, nice compact size that fit in my pocket nicely. As with any compact map, sometimes the street names were a little difficult, but overall very nice laminated map.

I primarily wanted a tube map. It turns out to be a small map on the reverse of the street map. Too small to be of practical value. Would have to carry a magnifying glass to be useful.

Good map

I bought this product to help manoeuvre London while we were there on a layover. What I liked about this product more than other ones is all the extra info about money, the tube, and landmarks. My one complaint, and the reason I gave it four stars, is that there is not a distance key. This made it harder for me to figure out how far one landmark was from another. Or one tube station from another. Otherwise, this is an awesome map that could replace all your other central London maps.

I thought I was purchasing a "new" item. The one I received has quite some wear and tear on it. I cannot read many parts of the map due to printing damaged by the fold wears. I recommend that you run--not walk--away from this offer. And, of course, mind the gap.

I think this is the one that worked pretty well along with the free map that they gave us when we first got on the underground - has tube stops on it I think so you can see which streets and sights are nearby.
