This is an excellent introduction and chronicle of an amazing natural based aid for the immune system derived from mushrooms. But the explanation of how it is produced and why processed as it is is enlightening and sets one's mind at ease. Especially in light of those compromised products coming out of China which might cast aspersions on "Asian supplements", this from Japan is not in any way to be categorized with such. As many friends of mine have used successfully an IMMPOWER, mushroom derived immune support in their cancer treatment as my own family members I had done my due diligence in investigating its track record from Daiwa Pharmaceutical in Japan. This book is the icing on the cake of needed information for one to evaluate its benefits in deciding whether or not to incorporate into their regimen. Do not hesitate to have this book in your personal arsenal of information, the return will well exceed the inexpensive cost! Good health to all !

I have to say I didn't read this book. I gave it to a dear friend who has terminal cancer. He and his wife read the book, and thought it was very helpful. He has been using an AHCC product that I originally bought for him, and I wanted him to be as informed as possible about the benefits of this product. If you read this review, please say a prayer for my friend, John and his wife. They have 4 small children, and need all the prayers they can get. Thank you.

Great read. I am only wondering why the stuff is so expensive. If you are interested in mushrooms you might want to check out what David Wolfe is saying.

This book is not what I expected. This information may be helpful, but it didn't suit my purpose.

I read every page as soon as received. It very enlightening. I ordered AHCC as a preventive

measure for myself. I also ordered a copy for my sister who had recently been diagnosed with lung cancer. I recommended she try the AHCC.

This book answered all my questions and more. If there was any question as to my purchasing this medication it has been answered. Once again a wonderful purchase from .Teresa Smith

An amazingly informative book about AHCC, which is now getting a lot of press for a recent study (2014) that noted that 3,000 mg of AHCC was enough to eradicate HPV; me? I take it as an overall "tonic"- the book is informative without getting into too much chemistry jargon, goes into detail about how it's grown, manufactured and the high purity standards that go into this little marvel. I liked the book.

A wonderful book! My wife is doing chemo (after we tried a rigorous holistic approach first) and she has almost zero side effects. This book opened our eyes to more than the power of medicinal mushrooms, it shows you via clinical evidence how AHCC can dramatically improve the healing rate from cancer. Very well written!!
