Customer Reviews

Purchased this book for a friend who has his master's in Energy Engineering. He wants to change the Energy Policy in Afghanistan and was in great need of this book. It took us over 2 months and loads of trouble to get the book there. I hope that it provided good value and became a good resource for the Engineering Faculty in Kabul University. Our goal is to build the Kabul Universities Engineering Faculty library with up to date books and reference manuals for students to be able to learn from cutting edge theories and advancements in energy sector.
