Lockheed P-38 J-L Lightning (Yellow Series)

Synopsis

The P-38 was the only American fighter aircraft in production throughout American involvement in the war, from Pearl Harbor to VJ Day. With its unusual twin-boom design, this was one of the most distinctive fighters of WW2, and saw action in all theaters of the war, being especially effective in the Pacific area. This book describes the development of the later versions of this iconic warplane, with full technical details and many detail photos. Profusely illustrated with photos, including a comprehensive walk-around section showing all aspects of the airframe, and diagrams from official manuals. Includes 1/72nd and 1/48th scale plans, and color profiles showing many of the colorful schemes applied to the P-38 by its users.

Book Information

Series: Yellow Series

Hardcover: 112 pages

Publisher: MMPBooks; 2nd ed. edition (June 19, 2013)

Language: English

ISBN-10: 8361421696

ISBN-13: 978-8361421696

Product Dimensions: 8.3 x 0.6 x 11.7 inches

Customer Reviews

From InternetmodelerBy Chris Banyai-Riepl[...]The book covers each variant in detail, both in the written text and in scale drawings. [...]. Complementing the text and scale drawings is the imagery, of which there is plenty. There are period photos as well as detail photos of museum and flying warbirds. The color profile illustrations highlight the varied color schemes and creative nose art often worn by P-38s. While there have been many books written on the P-38, there is always room for more and this book provides a great single-point reference for late-mark P-38s. From IPMSUSA.org[...]To add icing to the cake, MMPBooks includes a fantastic folded poster, illustrated by Dariusz Karnas. Karnas created a six-view illustration of a P-38L-5 in 1/48th scale. On the

reverse side of the poster, also in 1/48th scale, Karnas presents a five-view illustration of a P-38M. This publication is highly recommended for its excellent content, use as a research tool, use as a modeling guide, and coverage of a very unique aircraft.

A lot of various P-38 models and paint schemes. Interesting and good background for historically interested and model makers. A nice addition to other books on the P-38 for P-38 fans; contains information not readily found in other books.

This is a really neat book. I have a lot of warbird books, and this is one of the best, especially if you're a big fan of the P-38. There are tons of Mustang and B17 books and not too many really good ones on this aircraft. There is a lot of technical information, as well as great photos and drawings. Recommended for aircraft buffs.

Informational

Love books on the P-38

very good book

I've always thought the P-38 was the best looking airplane the US ever developed. A friend flew them (he actually flew a J model which is the subject of this book. So after reading this book I loaned it to him. He was based in Italy and in January of 1944 was on a mission over Vienna. A large caliber anti-aircraft shell went off under his plane. Both engines quit, the electrical system quit, control cables were cut so he had no control at all. He wasn't flying, he was just inside a bunch of scrap metal. So he opened the canopy and got out. Page 3 of this book mentions "a high risk of injury to the pilot when he was forced to bail out, due to the tail arrangement." My friend hit the tail as it went by, compound fracture of his right leg and he thought his left leg was broken. He looked down, his right foot was pointed backwards and blood was coming out where the bone came through the skin. Landing in a chute is difficult, about like jumping off the roof, and his legs must have smarted a little. He looked further down and the ground was getting closer. He doesn't remember what he was thinking, but it couldn't have been good thoughts. He might have even thought of a few select words not used in polite company. He spent from then to the end of the war in a German POW Hospital. As for a description of the book, it has dozens, perhaps hundreds of

pictures, many never published before. I enjoyed reading it and so did my friend.
