Alan Leftridge has served as a seasonal naturalist in Yellowstone National Park and a wilderness ranger in the Mission Mountains Wilderness. He earned a bachelor's degree in biology at the University of Central Missouri, a secondary teaching credential from the University of Montana, and a Ph.D. in science education and cultural geography at Kansas State University. His career has included teaching high school science in West Yellowstone, science courses at Miami University, and environmental studies at Humboldt State University. The Best of Rocky Mountain National Park is his fifth book with Farcountry Press.

A decent book to read before you get to the park. In Kindle format, the maps are almost useless but it does give a good description of things to see and do in the park. I used it as a reference for when we got there, but found the park materials to be more useful when actually at the park.

The book is great at making lists: the best of this, the best of that, but is very short on useful information like where these "best" things are. There are no useful maps and no real guidance on planning your visit to Rocky Mountain National park. It might be helpful if you've been to the park a few times and want to check off the things you've seen, but as a guide for a first time visitor it's almost useless.
