Backyard Bounty: The Complete Guide To Year-Round Organic Gardening In The Pacific Northwest

Synopsis

Are you itching to start your own garden or improve the yield from the one you already have but feel that gardening is too challenging or time consuming for your busy schedule? Would you like to enjoy fresh, home-grown produce every month of the year? Backyard Bounty is like having your own master gardener to consult every step of the way. This encyclopedic reference demystifies gardening, bringing it back to the down-to-earth, environmentally practical activity that anyone can enjoy. Learn about: Planning your garden and preparing the soil Organic fertilizers and simplified composting Growing healthy seedlings, transplanting, easy weeding and mulching Growing fruit and simple pruning methods Greenhouses, tunnels, and containers Organic pest management and more Packed with a wealth of information specific to the Pacific Northwest, this complete guide emphasizes low maintenance methods, exposes common gardening myths, includes a monthly garden schedule for year-round planting and harvesting, and features plant profiles for everything from apples to zucchini. Perfect for novice and experienced gardeners alike, Backyard Bounty shows how even the smallest garden can produce a surprising amount of food twelve months of the year. Linda Gilkeson is a passionate organic gardener with over forty years of gardening experience. She is a regular instructor in the Master Gardener programs in British Columbia and has led hundreds of workshops on pest management and organic gardening. Her Year-Around Harvest is considered the definitive guide to winter gardening on the west coast.

Customer Reviews

New book from Linda Gilkeson; This is the sort of news that organic gardeners in BC should get excited about; Whether you're a novice gardener or a seasoned grower, there's lots of really practical, helpful insights in this book. And, like the WCS Growing Guide, it's regionally specific, so there's no guess work in adjusting the planting schedules; We see lots of new books come in, but this one deserves some attention, in my opinion. West Coast Seeds blog Are you itching to start your own garden or grow more in the one you have, but feel that gardening is too challenging or time-consuming for your busy schedule? Would you like to enjoy fresh, home-grown produce every month of the year? Backyard Bounty is like having your own Master Gardener to consult every step of the way. Linda Gilkeson is a passionate organic gardener with over 40 years of gardening experience. Her Year-Around Harvest is considered the definitive guide to winter gardening on the West Coast. She is a regular instructor in the Master Gardener programs in BC and has led hundreds of workshops on pest management and organic gardening. As the Executive Director of the Salt Spring Island Conservancy, Linda is deeply committed to preserving natural ecosystems through conservation and public education.

I think this is a very informative book for the PNW gardener...including information on bugs and issues we face with vegetable plants and fruit trees. The book isn't listed by chapter for each month of the year, but there is a lot of information included for every season throughout the book. Would love to have seen colored pictures, instead of the B&W ones, because you show examples of bugs on the plants, rust on leaves, and more....and it would be nice to be able to compare them to issues on my leaves and plants.

I'm a newbie gardener. I bought a bunch of vegetable gardening for PNW books and this was the easiest one that I read.

Linda Gilkeson is the best writer about gardening in the PNW. Period.

Must read if you are trying to garden on the coast or Islands of the Pacific Northwest. Our temperate cool climate is a challenge, and these season extending techniques will allow you to grow many more "normal" crops. Not a good reference if you are in the "normal" areas of the US - like Phoenix.

I live in the PNW and have LOVED this book! Though I'm no greenthumb, she has everything calendared out through the year, so if I miss some planting/gardening one month, I just roll on to the next month and pick up where I left off.

This is great book if you live in the NW away from the high desert. The book is thorough and full of good information for intense gardening and year-around gardening. It's well worth the purchase price.

I'm in the NW and truly grateful to this author and publisher. They have provided an interesting but easy to read, thoughtful, uncomplicated - but not overly simplified - guide to growing my Willamette Valley back yard with healthy produce. We have very specific needs for each of our NW area micro-climates, This author held my hand when I needed it and then led me as needed to more information when I was ready. Thank You!

This was my first how-to-garden book and I was so happy to find one specifically for organic gardening, specifically for the Pacific Northwest. Internet sources are good for general gardening tips; this book is perfect for specific regional tips, planting timetables by season and month, plant troubleshooting (aphids!) and how-to's. I used it as my reference constantly over the last year. Planning my garden was much less frustrating with the lists of plants easy, medium, and challenging to grow in this region. Recently, I found the chapter on seed starting to be a great refresher for starting my own seeds. I'm new to Seattle AND to gardening, and this book has been invaluable for me to learn the quirks of growing in this climate. I bought the Kindle version so searching the full text for specific topics is so easy. My only critique is that the monthly planting schedules are a little hard to read in the digital format.
