## Customer Reviews

Touch, Think, and Learn your ABCs. Sturdy, beautiful, and interactive, an ABC book like no other.

Featuring spreads each with raised shaped letters and objects that fit into scooped cutouts on their opposite page. Seeing the image, tracing its shape, saying its name: these modes of perception combine in a dynamic way to stimulate understanding of essential concepts. In a format unlike any other, these groundbreaking books translate abstract thought into tangible knowledge.

Absolutely beautiful! This is a wonderful addition to my kids collection of books. The graphics are stunning and the quality is excellent. My kid loves to trace the cut out letters with his hands while I read out the letters to him. Highly recommend!

Wonderful book to introduce letters to your toddler. This book is beautifully illustrated with bold colors and texture throughout every page to keep your toddler engaged and curious to touch everything! Cool and modern illustration with great examples for each letter. Wish I found this book sooner! It is my go-to now as presents for parents with young children.

After buying Opposites from the same author, I was really interested in seeing other books from him. I bought two books of the ABC Touch Think Learn, one for my niece and one for my daughter. I liked how he used different things to go with each letter of the alphabet and I liked how the pictures, you can feel what the letter of the alphabet was describing.

A great value for this book! It is of high quality, the drawings are very pretty. I like the fact that pages are touchable, the letters come out and the animals go in providing sensory exploration opportunities for young children. Bought one for my nephew will buy one for my class and for another nephew. Really good value at 14.99 instead of 24.99.

This book is just lovely. The illustrations are simple and elegant, and the craftsmanship is excellent. Pages are sturdy and the cut outs and textures invite you to run your hands over them. It's really engaging; both parents and kids enjoy this one in our house!

Such a beautiful designed book! It isn't just the design that is beautiful, it is incredibly well produced with very high quality materials. My daughter loves using this as one of our daily training books to learning her letters.

Colorful book with nice texture. My three year old enjoyed it and going over each letter. I agree with another review about wishing the letter v was bold. The book is well made but there's spacing in the book that allows it to be punctured. I'm unsure if it was there when we received it or if it happened while looking through the pages. We received it today and it already has a hole so I'm not sure how it will hold up with frequent reads.

My daughter LOVES these books. They are raised and so she can feel them. They are very well constructed and simply beautiful with a clean design. Easy to flip pages too. Highly recommended for babies/toddlers and for gifts!
