Grade Level: Preschool - 3

Customer Reviews

Fabulous. I tutor in an adult literacy program. My granddaughter gives me suggestions from her reading program for me to use. I was quite surprised at how well my student did. There is a flow to the reading that made it much easier to comprehend. The lesson was much more enjoyable for both of us. We have struggled over sight words and very juvenile stories. This series actually teaches something and enabled my student to read something of interest.

Excellent book for beginning readers. Great format - I read, you read. Love the story!

About the Ocean is a great introduction to science for young readers. It contains lots of very interesting facts about life in the ocean and the book is written in a way that any difficult words are first read by the parents in their text, so the child is exposed to it already when it is their turn to read

it. Wonderfully colorful pictures also lead the child's reading. As someone who has 20 years in education, I can tell you it is a great educational tool.

I absolutely love the We Both Read book series! This is a great way to spend time with your child learning to read. One page is for parents and the other is for the child. You can make it a little more challenging as your child's reading level advances having them try to read the parent page. I would recommend this book and any other in this series to everyone with a child learning to read.

I bought this for my granddaughter (5 years) she loves learning about the ocean. I'm still doing most of the reading.

My son loves anything ocean related, but the reading is a little boring. I would look for a different book if I could do it again

Purchased for 6-year-old grandson. He loves the book.

love the idea of reading together with my child
