## Customer Reviews

Lots of word jumbled up letters. Thought it was a dicky download but have removed and downloaded again. Still no good. Good book but annoying at the same time because of the above. The 4 stars are for the content not the print.

FACTS FACTS FACTS

Very interesting

Must have book. Others have stolen from it but the original is always the best

Learning about the real earth we live on is fascinating. Do we really live on a planet ? ~ or has something extraordinary been hidden for 500 yrs.under the control of a few in powerful places? What are the facts and proofs? When you look up to the sky are we really traveling over 1000 miles an hour on a spin? Are we also traveling around the sun at 67,000 mph ?? And then around the Milky Way at 514,000 mph???~ with not even the slightest hair out of place? Why doesn't the atmosphere fly off our "planet" when we are surrounded by a vacuum of unfathomable measure.Great Info Here if you want to know.

Ladies and gentlemen, the Earth may very well be flat!

Definitely beyond interesting - Found reading this book very intriguing
