Nick Dakin is prolific writer and consultant on aquariums and saltwater fish. He has over 30 years experience keeping and breeding fish and invertebrates of all kinds. Julian Sprung is a marine biologist, scuba diver and consultant. He is a contributing editor of Freshwater and Marine Aquarium magazine.

I bought this thinking it's something different than what Mr. Dakin wrote 10 years earlier and for the most part it's not! If you've read the other one with a blue cover that came out in 93' don't buy this one! This one is about 90% the same book. Why this book was printed, I have no ideal! It has a little more detail regarding filtration but most of it has been reprinted from the earlier book! On the plus side this baby is very rare(less than 10000)copies! Also, I heard because Fenner's Conscientious Marine book was a blockbuster(3 printings) and no better than this one Dakin and his supporters wanted more exposure! This thing should still be in print! In PAPERBACK, it's huge(10 x 12)& 2plus pounds!

I usually don't pay this much for a book. But this one? Worth every dime. Great seller!

I have several Saltwater Aquarium books and each one has new information that I can use.

I love this book and use it all the time. I used it as a reference when I was just starting out but still use it as I consider adding new items to my tank. Any saltwater aficionado knows you can never just get a clown fish!

I have a 300 gallon reef tank with many fish and corals. I got this book to increase my knowledge and ability to properly care for my fish. Its well written and did the job.
