This book is not a sensory experience at all. Most pages have sparkly portions of trucks and the ones that have an actual item to "touch" are so very small even my little guy's tiny fingers can hardly

feel, let's not discuss how his nine month old fingers and brain don't quite communicate properly every time to follow the small area of material available for touching. Do not bother for the sensory experience with this book

A very cute and nice board book for my little guy. Problem being the touch and feel pages as in the 'things that go' book, have too many shiny fill in pages between the cool pages. We don't think the concrete mixer and shiny parts on the fire truck are interesting or cool at all. I think it takes away from the book some. That's too bad. Could have been great

this is a nice book with bright colors, plain background and clear pictures. The size is perfect for little hands and it is sturdy enough to survive being kicked, bite, step on , thrown ...My baby loves cars and trucks , he even has his favorite picture .But just a warning , the title of this book is misleading because there is very little to touch . most pictures have shiny or sparkly paper but just 3 or 4 have texture and they don't cover much area. In my case it didn't matter much because my kid really enjoys the book but when I bought it was expecting more textures .

My biggest complaint about these DK touch and feel books in general is that not every page has something to touch! One page has a shiny truck with nothing to touch...but then the next page has this creative bale of hay made out of plastic mesh with the farm loader! And then a shiny truck with nothing to touch...and then a sticky cement for the roller! Hmm...the baby skips the pages with nothing on them.

Perfect size for little ones. The "touch and feel" wasn't really noticeable....but all in all, cute book

Okay book. There isn't as much to "feel" as other books.

My 1 year old loves this book. The touch and feel books are great to keep kiddos interested!

Captivating. Particularly impressed at author's ability to articulate the actual Fire Truck sound in text. Without spoiling it for the reader- must read.
