Customer Reviews

With the exception of a few minor inconsistencies between this workbook and the textbook, this is a really valuable study tool. I didn't get this until near the very end of my first year, which is primarily classroom instruction that relies heavily on Egan's, and I wish I had purchased it at the very beginning of my RT program. For anyone who likes to have homework in classes that otherwise don't assign it, this workbook is a great resource. It is a combination of critical-thinking short-answer

questions, case studies, and multiple choice questions. Do be aware, however, that this workbook does not include the answer key within its pages. You'll need to have an online account with Elsevier that comes with a new copy of Egan's. All in all, it's well worth the money and will prove to be helpful when it comes to NBRC prep.

This book has become my bible! It has increased my exam scores by one full letter grade. Egan's workbook helps to confine reading materials from the textbook and narrow the materials needed to fully comprehend the objectives of each chapter. Doing the actual workbook assignments help me to evaluate my understanding of the materials being presented. It is a well-written workbook in correlation to the textbook. Love it! Classmates are asking me how I study and what I do to obtain great results on exams...I tell them Egan's workbook and they say that's it? Yup, that's it!

This shipment and the condition of this book work great. However, this book sucks. You'll have to use it through your whole program and it will manage to make something so simple super difficult. Good luck with this book. It is evil.

The workbook I got was missing 4 chapters 36-40 ... and not torn out or missing, just never printed in the book. It went from page 351-401. This was terrible as I didn't notice until 6+ months later when I got that far in to the book.

Bought for my grand-daughter. This was needed for her Respiratory Therapy studies.

great price and great condition... Still have it and it really helped me in respiratory school!

Exactly what I wanted to help prepare for AIT, 68V. Studying beforehand makes Learning easier at the school house.

Text book, required for class, good information
