Customer Reviews

For those of you who don't know how to start "working from home" this is the book for you. Get it!

I bought this book on a whim couple of weeks ago. It positively unlocked a world of options for me! I'm loving this book - it provided just as promised. I am very happy that I have new ideas and found new resources of how to grow a virtual assistant business.

I'm an Independent Virtual Assistant and doing jobs at many Freelancing platform. This book teaches me many thing, how to satisfy your clients, how to be responsible. how to accept your faults and many other useful things. Highly recommended.

People nowadays have online access just about anywhere. Gone are the days that you can only use the internet at the office or school. Now, everything is accessible at the comfort of your own home. With that in mind, this book opens a new idea of starting a career as a virtual assistant. Why travel to the office every morning where you can work conveniently at home? Get to know tips on how to grow this career, be efficient, and eventually earn more than what you need.

Provides very little usable information. I've been researching becoming a Virtual Assistant and everything that is outlined in this "book" was already WIDELY available for free on various VA blogs. This book provides vague ideas for having the right attitude, and no actionable advice for finding and retaining clients. Angry that this author got my money, even if it's just a measly \$2.99

Don't bother

To be fair, I only read the sample to decide if the book was of value. While I expect it could be worse, the writing is not at a level I would have expected, and the writer failed to demonstrate any expertise on this subject (at least not in the sample, which is where it matters). Possibly his expertise is avoiding lawsuits, as I noticed the multiple disclaimers and legal notices at the beginning. I suggest looking for a better book on this subject.

While the cover looks amazing, the content didn't seem that cohesive, and did not address topics specifically directed towards general virtual assistant work.
