KEY WORDS FLASH CARDS: Level 1: A Child's Introduction To Reading (Key Words Flash Cards Collections) (Volume 1)

Synopsis

Just 25 most commonly used words make up about one-third of all words written or spoken in English. The first 100 most frequently used words make up about one-half of all written and spoken English. These are most commonly used and most important words when it comes to understanding and creating correct sentences. However, most of these words are not the nouns and verbs presented in most sight word collections. As well as the most commonly used nouns and verbs, they include the "glue" words without which understandable sentences cannot exist. These are words such as: "Yes", "No", "the", "not" "with", "and ", "too", "very", "all" and many others. All these and many more of the most important and most frequently used words are effectively presented in both word and sentence form in this book.

Great for a beginning reader.

I was provided a complimentary copy of this book so I could give an honest review.Philip Gibson,

has a great approach for beginner readers using the flash card approach. A singular new word is introduced utilizing a flash card. Consecutive flash cards compose more and more complex sentences, while remaining very simplistic for the beginner reader. The learning process is more a game than a lesson - and much less threatening for the shy child.The pictures are simple drawings that support the visual learner, reading aloud supports the auditory learner, and I would suggest having the child write the new words to support the kinesthetic learner.

My grand daughter is starting kindergarten and I downloaded this book to help her get ready. It was perfect! It's written so that young readers are not overwhelmed. She was surprised and thrilled that she was reading! Sentences!I would definitely buy other books like this one.I was given a complimentary copy of this book to read and write an honest review.
