Customer Reviews

The prices of the two products are ludicrous. Almost four hundred dollars, and that doesn't include shipping. I. Don't think Medicare will cover it.

Herpes is a rare topic people talk about openly because of some misconceptions on what it really is and how people get it. Several of these misconceptions are: All people who sleep around get Herpes and that all people who have Herpes are sexual miscreants. Which is not really the case. This book made me understand and know more about Herpes. Few things I have learned is its connection to Alzheimer's disease, how baking soda could help it and that Herpes can be acquired everywhere even from your doorknob. This also discussed natural treatments and cure for Herpes which is very helpful. I liked it most when the author discussed how would we be able to protect ourselves from this disease as well as protecting our loved ones from it. Good read!

Before reading this book, I did know much about Herpes. I thought it was just a virus that attacks

only the skin which gives sores to it. Little did I know that it has more terrible effects! It can even be the cause Alzheimer's Disease. Indeed, a lot of people always associate it with sexual transmission (which is actually mostly true as it is the most effective way of transmitting it to other people) but the virus can also be transferred through mere skin contact. This book also has the natural remedies for Herpes that can stop it from developing. Also, how the Miracle Mineral Solution can help is discussed in this book. Everyone should be aware of this disease so we can prevent it from spreading. I highly recommend this book to everyone!

I had gotten HSV1 at the side of my lips before. At first i thought it was just a really bad pimple. It grew bigger after a few days and healed very slowly because when it starts healing, i would accidentally open my mouth too wide when eating and man that hurts so bad.... anyway, this book shows some natural ways to cure the different types of herpes... this is a must

A real waste of time, nothing of real use here. Very superficial, and very poorly written.
