# Biomimicry In Architecture

## Synopsis

When searching for genuinely sustainable building design and technology - designs that go beyond conventional sustainability to be truly restorative - we often find that nature got there first. Over 3.5 billion years of natural history have evolved innumerable examples of forms, systems, and processes that can be applied to modern green design. Aimed at architects, urban designers and product designers, this new edition of *Biomimicry in Architecture* looks to the natural world to achieve radical increases in resource efficiency. Packed with case studies predicting future trends, this edition also contains updated and expanded chapters on structures, materials, waste, water, thermal control and energy, as well as an all-new chapter on light. An amazing sourcebook of extraordinary design solutions, *Biomimicry in Architecture* is a must-read for anyone preparing for the challenges of building a sustainable and restorative future.

## Book Information

Paperback: 176 pages

Publisher: RIBA Publishing; 2 edition (November 11, 2016)

Language: English

ISBN-10: 1859466281

ISBN-13: 978-1859466285

Product Dimensions: 0.8 x 7.5 x 9.5 inches

Shipping Weight: 1.2 pounds (View shipping rates and policies)

## Customer Reviews

Michael Pawlyn is an architect and has a well-earned reputation as a pioneer of biomimicry. Before setting up his own practice, Exploration Architecture Ltd., he worked with Grimshaw Architects for ten years and was central to the team that radically re-invented horticultural architecture for the Eden Project. He lectures widely on the subject of sustainable design.
