Customer Reviews

• Very user friendly, easy to navigate through, examples are clear and uncomplicated, examples /case studies are interesting. Well written and understandable at all levels. Overall, I feel it is probably one of the best text books I have ever used. • Carol Lazich, George Brown College, Canada • Covers retail math throughout the text instead of in its own section. Snapshot and trend watch are better than many articles I supplement from WWD. They are great, fresh applicable for classroom discussion. The overall text is a great, one-stop-solution to teach both buying concepts and actual retail math execution. • John Conte, Wade College, USA • The text has good information relating to a buyer's role in retailing. . . A good text for a Basic Buying course. • Marla Green, LIM College, USA • A good comprehensive text to show the traditional role of the buyer within the US market. With an easy to follow and logical sequence, it shows the breadth of tasks in the buying and merchandising function well. • Helen Beney, University of Westminster, UK • Very user friendly, easy to navigate through, examples are clear and uncomplicated, examples /case studies are interesting. Richard Clodfelter is a Distinguished Professor Emeritus in the College of Hospitality, Retail, and Sport Management at the University of South Carolina, US, where he taught retail buying, internet retailing, and entrepreneurship.

Practical but I have read much better than this one.

I like it very much and helpful for my lecture

The book is great. I think it is a little textbook-like but it meets my needs. I would probably recommend this book to others. The book came to me right away.

good one

The book was as describe and exactly what I needed for class. The book was in very good condition as described.

Purchased this book "used", but were very surprised to see that it was actually brand new, without the shrink wrap, and the only sign of it being used was, in fact, a "used" stamp placed on the top of the book. That's it. Didn't look like it was actually ever opened. Saved \$60. Very happy.

good book

As far as I know it was fine it was for my daughter who is attending school in San Fran. I buy all of her books on because of the price. I get excellent deals on new books. They are much more expensive if they are bought on campus.
