Home Quick Planner: Reusable, Peel & Stick Furniture & Architectural Symbols

Synopsis

The Home Quick Planner includes 700 precut, reusable peel-and-stick, 1/4-inch scale furniture and architectural symbols, plus a 5,600 square-foot floor plan grid to help you design your own building, remodeling and decorating projects. (Also good for moving.) Symbols include everything you need from tables, chairs, couches, beds and pianos to every standard kitchen cabinet and appliance, an extensive assortment of bathroom fixtures and cabinets (for example, twelve sets of sink designs, six different showers, and a dozen various baths and whirlpools), plus windows, doors, walls, switches, outlets, lights and much more. Simply lift the symbols and arrange them on the floor plan grid to design floor plans, move furniture and make changes. Step-by-step instructions and Design Details: Critical Dimensions & Clearances are provided to help you improve your design and save money. After you've finished designing your floor plans with the Home Quick Planner, you can build a three-dimensional model of your design with the 3-D Home Kit (also by Daniel Reif).

ISBN-13: 978-1880301036

Product Dimensions: 0.2 x 9 x 12.2 inches

Shipping Weight: 6.4 ounces (View shipping rates and policies)

Average Customer Review: 4.0 out of 5 stars 187 customer reviews

Best Sellers Rank: #34,120 in Books (See Top 100 in Books) #3 in [Books > Crafts, Hobbies & Home > Home Improvement & Design > Furniture](#) #18 in [Books > Crafts, Hobbies & Home > Crafts & Hobbies > Decorating](#) #29 in [Books > Arts & Photography > Architecture > Interior Design](#)

Customer Reviews

These are so much fun! Very helpful and easy to use. They are missing some stuff and don't have enough of some items. I would request they come up with an outdoor sheet. That way they could include barbecue grills, a couple extra dishwashers, mini refrigerators, more stools, hot tub, pools, more shrubs, fences, brick walls, trampoline, different sized seating.... For the inside of the house - missing French Door sized fridge, Murphy bed, office couch, padded bench, solar tubes, home

water filtration system. This packet had everything we needed to execute our overall design plan to the contractors and eventually architects. We easily made it work with what they provided, just would like some of the pieces mentioned above. I'd recommend buying 8:1 sheets of traceable graph paper to use instead of the sheet provided. It works, but the 4:1 ratio makes it harder to be really accurate, plus then you can draw your lines with a ruler and save a ton of time by not using the stickers for that part of your project.

This was, and remains, the best kit I have ever seen for putting together an interior design plan for a new home, garage, guest quarters or whatever. Movable stickers allow for easy re-dos as your ideas evolve. Many sizes of interior components such as cupboards, windows, chairs, tables etc. allow great flexibility to put your already existing furniture into the space design so you know just how it will look and function without having to buy everything new for a new home, etc. I actually bought a 2nd kit to use to design our new home while our garage/workshop/guest quarters (1st kit) was being built so I could flex both designs as needed. Well worth the price.

This is my second one! I love this kit except the pieces stop sticking after you move them a few times and the graph paper sticks to the pieces some times. It has made designing an addition so much easier. You can try all sorts of options and then share them with draftsmen or contractors or your spouse in a way that everyone can understand. I would have gave it 5 stars if they pieces didn't lose their stickiness and pull up the graph paper.

I've used this before to remodel my home. Now we are using it to plan the building of a new home and it is very handy to lay out, discuss, and easily change ideas. I keep paper and a pencil close by so we can get a "big idea" of what we are wanting, and then I lay out the "detailed" idea on the planner and we reposition the elements once we SEE them and where they are most functional. The stickers also serve to remind you of appliances/furnishings/elements you might have forgotten or that might be a good addition to your plans.

What an amazing tool! Designed a new home from scratch - ended up saving me hundreds of dollars and time on getting the furniture placement right! Also has a ton of great stickers for unique homes (e.g., pianos, pool tables) so you can really get exact with the space. Also avoids the schmoozy sales-focus of the online programs, always trying to make you upgrade to have a useful tool. This is a terrific value, and very useful product.

Not reusable as the description says. The decals stick like they are made of tape. When you try and peel them off you have to pick at them and then they do not restick. This makes walls useless because they curl after one use. I started cutting out the furniture with the backing on it then when you place the pieces they slide around. So overall it was not worth the money. I went back to simple graph paper.

My husband and I are having a home built. He made a small model of the house using the plans. We needed to find pieces 1/4 = 1foot. This peel and stick was perfect for what we wanted to do. We now know exactly where our furniture will fit best in each room. These pieces make our floor plan complete. Even though we didn't need to use all that were supplied in the kit, we found everything we needed and were very satisfied.

This is a great home planner. I have used it before, and now that I am building a new house, I had to have it. It has pockets for all your pictures, samples, etc. It will be indispensable in gathering all the information I will need or the house.
